AGILE / SCRUM PROJECT DOCUMENTATION**PRODUCT BACKLOG***Human Resources Management System (HRMS)*

Field	Value
Project	Human Resources Management System (HRMS)
Document type	Product Backlog - completed from the Expression of Need
Document reference	HRMS-PBL-001 (based on template HRMS-PBL-TPL-001)
Version	1.0
Prepared by	Scrum Team - HRMS Project (drafted for validation by the Product Owner)
Product Owner	Kowo Manfouo Elie Makoda
Scrum Master	Donfack Ateufack Robine Ninnone
Development Team	Dihou Stephanie, Noumsi Simo Abraham, Tsobeng Ifoue Marc Joel, Abbe Marwan Michel
Status	Submitted for validation
Classification	Internal - Academic project

Table of Contents

The list below is an automatic field. To fill in the page numbers, open the document in Word, select all (Ctrl+A) and press F9, then choose "Update entire table".

1. Purpose and How to Read This Document

This document is the Product Backlog of the Human Resources Management System (HRMS). A product backlog is a single, ordered list of everything the system must do, written in plain business language. It is the only authoritative source of work for the project: any need that is not written here is not part of the product.

Each line of work is written as a user story - a short sentence that describes something a user wants and why. The stories in this document were produced by translating each business need expressed by the Product Owner in the Expression of Need (references BN-01 to BN-183) into one user story, keeping a traceability reference so that every need can be checked against the story that covers it.

This document is self-contained. A reader does not need the other project documents to understand it: the vocabulary is defined in section 4, the users (actors) are described in section 6, and every abbreviation is spelled out. Read the sections in order the first time; afterwards, section 9 (the backlog itself) is the part used every day.

How the pieces fit together

- An EPIC is a large area of the system, too big to build at once (for example, Payroll). It is a folder that groups related user stories.
- A USER STORY is one small, useful piece of an epic, deliverable inside a single two-week sprint. It is written as: As a [user], I want [something], so that [benefit].
- ACCEPTANCE CRITERIA are the conditions that must be true for a story to be accepted, written as Given / When / Then.
- A BUSINESS NEED (BN) is a need expressed by the Product Owner. Every user story points back to at least one BN so nothing is built without a reason and no need is forgotten.

2. Product Vision

The vision below is the compass used to arbitrate priority conflicts. It is drafted by the Scrum Team from the context and objectives stated by the Product Owner and is submitted for his validation.

Element	Statement
FOR	the HR, payroll, accounting and management staff of the organisation, and every employee.
WHO	today manage human resources with paper files, scattered spreadsheets and manual calculations, which cause lost information, calculation errors, late declarations and no reliable indicators.
THE	HRMS (Human Resources Management System)
IS A	single, integrated HR and payroll platform
THAT	covers the complete life cycle of the employee - from recruitment to departure - and produces the payroll, the legal documents and the OHADA accounting entries automatically, with no double entry.
UNLIKE	the current situation, where payroll lives in one unprotected spreadsheet mastered by a single person and accounting entries are re-keyed by hand,
OUR PRODUCT	keeps one reliable employee record, calculates payroll by configurable rules that follow the law, and delivers balanced, auditable accounting entries ready to use.

3. Agile Framework and Roles

The project uses the Scrum framework. Work is delivered in sprints of two weeks. The table below states who is responsible for what on this backlog.

Role	Holder	Responsibility on the backlog
Product Owner	Kowo Manfouo Elie Makoda	Owns the backlog: expresses the needs, validates the user stories, defines the acceptance criteria, sets the business priority, and accepts or rejects each increment.
Scrum Master	Donfack Ateufack Robine Ninnone	Guarantees the process: facilitates refinement and planning, protects the team, removes impediments, and keeps this backlog visible and up to date.
Development Team	Dihou, Noumsi, Tsobeng, Abbe	Estimates the stories, decomposes them into technical tasks, commits to the sprint backlog and delivers stories that meet the Definition of Done.
Stakeholders	HR, Payroll, Accounting, Management	Provide the business rules, review the increment at the sprint review and raise change requests through the Product Owner.

4. Definitions and Conventions

Term	Definition applied in this project
Epic	A large body of functionality covering a complete HR area (for example Payroll). Too big for one sprint; split into user stories.
User Story	The smallest unit of business value, written from the point of view of a user, deliverable inside one sprint.
Task	A technical activity produced by the team when decomposing a user story (design, coding, test). Estimated in hours; not shown in this backlog.
Story Point (SP)	A relative unit of effort combining complexity, volume and uncertainty, estimated with the Fibonacci scale (1, 2, 3, 5, 8, 13, 21).
Acceptance Criteria	Verifiable conditions, written Given / When / Then, that must all be satisfied for a story to be accepted.
Priority (MoSCoW)	Business importance: M = Must have, S = Should have, C = Could have, W = Will not have (this release).
Definition of Ready	The checklist a story must satisfy before it can enter a sprint (section 12).
Definition of Done	The checklist a story must satisfy before it can be declared finished (section 13).
Velocity	The number of story points actually accepted by the Product Owner during a sprint.
BN	Business Need - a need expressed by the Product Owner in the Expression of Need, used as the traceability reference.
OHADA / SYSCOHADA	The accounting system that applies to the organisation (chart of accounts, journals, books, financial statements).

Identification and naming conventions

Object	Format	Example
Epic	EP-nn	EP-07 - Payroll management and payslip printing
User story	US-nnn	US-113 - Produce and print the individual payslip
Task	TK-nnn-n	TK-113-2 - Develop the PDF export service
Business need (traceability)	BN-nn	BN-113 - Payslip must carry all legal mentions
Sprint	SP-nn	SP-07
Release	R-n	R-3 - Payroll

5. Estimation Scale and Priority Rules

The Development Team estimates each story in story points on the Fibonacci scale. Estimation is relative: a story is compared with a reference story. The story-point values shown in the backlog are proposed and will be confirmed by the team during planning poker.

SP	Meaning
1	Trivial - a few hours, no unknown.
2	Very simple - a simple screen or rule already done before.
3	Simple - standard create/read/update with a few validations.
5	Moderate - several rules, one integration point, careful testing.
8	Complex - calculation rules, several screens, significant testing.
13	Very complex - strong business logic (payroll, accounting entries).
21	Too large - must be split before entering a sprint.

MoSCoW priority

Code	Category	Rule applied in the HRMS project
M	Must have	Legal or vital. Without it the system cannot be used (employee record, payroll calculation, payslip, accounting entry).
S	Should have	Important, but a temporary workaround exists (self-service portal, advanced dashboards).
C	Could have	Desirable, delivered only if capacity remains (mobile notifications, biometric device connection).
W	Will not have	Explicitly excluded from the current release and kept for later.

6. Personas and Actors Register

Every user story is written for one of the actors below. This register makes the phrase at the start of each story (As an HR Officer, As an Employee...) meaningful without reading any other document.

Ref.	Actor / Persona	Main goals in the HRMS	Main constraint
AC-01	HR Manager	Steer the whole HR activity, validate decisions and obtain reliable indicators.	Full access to HR data.
AC-02	HR Officer	Manage records, contracts, leave, attendance and documents on a daily basis.	Full access except the salary of executives.
AC-03	Payroll Officer	Prepare, calculate, verify, validate and print the payroll.	Full access to salary data.
AC-04	Accountant	Retrieve the payroll accounting entries and control the payroll accounts.	Access to consolidated amounts.
AC-05	Head of Department (Line Manager)	Approve leave, follow the attendance of the team and propose promotions.	Access limited to the team; never sees salaries.
AC-06	Employee	Consult own record, request leave and download payslips.	Access limited to his or her own data.
AC-07	System Administrator	Manage users, profiles, parameters and technical operation.	No access to salary amounts.
AC-08	General Management	Consult dashboards and validate strategic decisions.	Read access to consolidated data.

7. Epic Register

The twelve epics below are the macroscopic decomposition of the product. Each epic groups the user stories that deliver one HR area. The module references (M-nn) show which parts of the Expression of Need each epic covers.

Ref.	Epic	Modules	Business value	Priority	Target release
EP-01	Organisation and department management	M-01	Gives the system the map of the company so every employee can be placed in it.	Must	R1 - Core
EP-02	Employee records management	M-02	Holds the complete, reliable file of every employee - the heart of the system.	Must	R1 - Core
EP-03	Contract and career management	M-04, M-08	Manages contracts and every career decision (promotion, transfer, departure).	Must	R1 and R4
EP-04	Attendance and time tracking	M-05	Records presence, lateness, absence and overtime that feed the payroll.	Must	R2 - Time and absence
EP-05	Leave and absence management	M-06	Keeps every leave balance permanently exact, visible and justified.	Must	R2 - Time and absence
EP-06	Timetable and work planning	M-07	Builds, checks and publishes work schedules and shifts.	Must	R2 - Time and absence
EP-07	Payroll management and payslip printing	M-11, M-12	Calculates salaries and produces all payroll and HR documents.	Must	R3 - Payroll
EP-08	Accounting interface (OHADA)	M-13	Turns the validated payroll into balanced OHADA accounting entries.	Must	R3 - Payroll
EP-09	Recruitment, training and evaluation	M-03, M-09, M-10	Manages hiring, skills, training and performance reviews.	Should / Could	R5 - Extension
EP-10	Employee self-service portal	M-14	Lets employees and managers act autonomously and safely.	Should	R5 - Extension
EP-11	Reporting, dashboards and HR analytics	M-15	Provides management with reliable HR indicators without manual work.	Must	R4 - Career and steering
EP-12	Security, roles, parameters and audit	M-16, M-17, M-18	Controls access, notifies the right people and configures the system.	Must	R1 and Continuous

8. Release Plan

The backlog is delivered in five releases. The order expresses the value the Product Owner wants first: the first releases must let the organisation run a complete payroll cycle (reached at the end of Release 3); the rest follows.

Release	Name	Content	Sprints	Epics
R-1	Core	Organisation structure, employee files, contracts, security and logins	Sprints 1 to 3	EP-01, EP-02, EP-03 (contracts), EP-12 (security)
R-2	Time and absence	Attendance, leave, work schedules and notifications	Sprints 4 to 6	EP-04, EP-05, EP-06, EP-12 (notifications)
R-3	Payroll (main goal)	Payroll calculation, payslips and OHADA accounting	Sprints 7 to 10	EP-07, EP-08
R-4	Career and steering	Career management, reporting and dashboards, deadline alerts	Sprints 11 to 12	EP-03 (career), EP-11
R-5	Extension	Self-service portal, evaluation, recruitment, training	Sprints 13 to 15	EP-09, EP-10

The module Parameters, import, export and integration (EP-12, module M-18) is delivered continuously across the releases, because configuration and data exchange support every other area.

9. Product Backlog

This is the backlog itself: one user story per business need, grouped by epic. Within each epic the stories are shown in a logical build order; the delivery order across the whole product is given by the Sprint and Release columns and by the Release Plan in section 8. The Priority column uses MoSCoW (M / S / C). The story points (SP) are proposed by the Scrum Team for confirmation in planning poker. Every story starts with the status New; it becomes Refined, then Ready, then moves through the sprint (see status codes in section 14).

EP-01 - Organisation and department management

ID	User story (As a... I want... So that...)	Acceptance criteria (Given / When / Then)	Prio	SP	Sprint	Need ref.
US-001	As an HR Manager, I want to register the identity of the organisation (name, legal form, registration and tax numbers, social-insurance employer number, address, logo and legal representative), so that this information is reused automatically on every printed document.	Given I am on the organisation identity screen, When I save the legal identification details, Then they appear automatically in the header of every generated document.	M	3	SP-01	BN-01
US-002	As an HR Officer, I want to manage a multi-level hierarchy of organisational units (company, site, division, department, service, team), so that every employee can be attached to a precise place in the structure.	Given the organisation screen, When I create a unit under a parent unit, Then it appears in the hierarchy at the correct level.	M	5	SP-01	BN-02
US-003	As an HR Officer, I want to manage a catalogue of positions (title, mission, required skills, salary category, reporting line), so that each employee can be linked to a defined position.	Given the positions catalogue, When I create a position with its attributes, Then it becomes available to assign to employees.	M	3	SP-01	BN-03
US-004	As an HR Manager, I want to manage the grid of professional categories, grades, echelons and coefficients, so that classification and base salary rest on a single reference.	Given the classification grid, When I define a category, grade and echelon with its coefficient, Then it can be used for classification and base-salary calculation.	M	5	SP-01	BN-04
US-005	As an HR Officer, I want to attach every organisational unit to a manager and a cost centre, so that accounting entries can later be broken down by cost centre.	Given an organisational unit, When I assign a manager and a cost centre, Then the cost centre becomes available to the accounting breakdown of payroll.	M	3	SP-01	BN-05
US-006	As an HR Manager, I want every change of the structure to be historised with an effective date, so that a past document remains readable with the structure valid at that date.	Given a change to the structure, When I save it with an effective date, Then the structure can still be consulted as it was at any past date.	S	8	SP-01	BN-06
US-007	As an HR Manager, I want to display and print the organisation chart of the whole company or a selected unit, so that the structure can be shared and communicated.	Given the structure exists, When I request the organisation chart, Then it is displayed and can be printed for the whole company or a chosen unit.	S	5	SP-01	BN-07
US-008	As an HR Officer, I want to manage several sites with different working calendars and public holidays, so that each site follows its own rhythm.	Given more than one site, When I assign a specific calendar and holidays to a site, Then time and leave calculations use that site calendar.	S	5	SP-01	BN-08

EP-02 - Employee records management

ID	User story (As a... I want... So that...)	Acceptance criteria (Given / When / Then)	Prio	SP	Sprint	Need ref.
US-009	As an HR Officer, I want to create, consult, modify, deactivate and archive an employee record (never physically deleted once used in payroll), so that the staff file is centralised and legally preserved.	Given a record already used in a payroll period, When a user tries to delete it, Then the system archives it instead of deleting it and keeps it consultable.	M	8	SP-02	BN-09
US-010	As an HR Officer, I want the system to allocate automatically a unique, non-reusable matriculation number in a configurable format, so that every employee has a stable identifier.	Given a new employee is created, When the record is saved, Then a unique matriculation number is generated in the configured format and never reused.	M	3	SP-02	BN-10
US-011	As an HR Officer, I want to record the civil identity (names, date and place of birth, sex, nationality, marital status, identity document and photograph),	Given the identity form, When I enter and save the civil identity, Then it is stored and available for documents and declarations.	M	3	SP-02	BN-11

ID	User story (As a... I want... So that...)	Acceptance criteria (Given / When / Then)	Prio	SP	Sprint	Need ref.
	so that the file can feed documents and declarations.					
US-012	As an HR Officer, I want to record contact details and an emergency contact, so that the employee can always be reached.	Given the contact form, When I save address, telephone, e-mail and emergency contact, Then they are stored on the record.	M	2	SP-02	BN-12
US-013	As an HR Officer, I want to record the family situation and dependent children with their birth dates, so that family allowances and tax deductions can be computed.	Given the family section, When I add dependants with their birth dates, Then this information is available to payroll for allowances and tax.	M	3	SP-02	BN-13
US-014	As an HR Officer, I want to record the social-insurance number, tax identification and professional identification, so that statutory declarations can be produced.	Given the record, When I enter the statutory identifiers, Then they are stored and used by the declarations.	M	2	SP-02	BN-14
US-015	As an HR Officer, I want to record bank details and the payment method (transfer, cheque or cash), so that salary can be paid correctly.	Given the bank section, When I save bank details and a payment method, Then payroll uses them for payment.	M	3	SP-02	BN-15
US-016	As an HR Officer, I want to record the administrative situation (department, position, grade, category, echelon, contract type, hire date, seniority, workplace), so that the employee is fully classified.	Given the administrative section, When I complete the classification fields, Then they are stored and drive payroll and reporting.	M	5	SP-02	BN-16
US-017	As an HR Officer, I want to attach scanned documents with a type and a validity date, so that supporting files are kept with the record.	Given a record, When I upload a document with its type and validity, Then it is stored and retrievable.	S	3	SP-02	BN-17
US-018	As an HR Officer, I want to record education, diplomas, professional experience and languages, so that the profile is complete.	Given the record, When I add education and experience, Then they are stored and searchable.	S	3	SP-02	BN-18
US-019	As an HR Officer, I want to search and filter employees on any criterion and export the result, so that lists can be produced quickly.	Given the employee list, When I filter by one or more criteria, Then the matching employees are shown and can be exported.	M	5	SP-02	BN-19
US-020	As an HR Officer, I want to be alerted when a document of the record expires (identity document, permit, medical visit), so that renewals are not missed.	Given a document with a validity date, When the expiry approaches, Then the HR officer receives an alert.	C	3	SP-02	BN-20
US-021	As an HR Manager, I want to keep the complete history of every record modification (author, date, previous value), so that changes are auditable.	Given a record is modified, When the change is saved, Then the previous value, the author and the date are kept in the history.	M	5	SP-02	BN-21

EP-03 - Contract and career management

ID	User story (As a... I want... So that...)	Acceptance criteria (Given / When / Then)	Prio	SP	Sprint	Need ref.
US-028	As an HR Officer, I want to manage the various contract types (permanent, fixed-term, internship, temporary, apprenticeship, service), so that every employment relationship is represented.	Given the contract screen, When I choose a contract type, Then the fields and rules for that type apply.	M	5	SP-03	BN-28
US-029	As an HR Officer, I want to record the contract details (start, end, trial, notice, weekly time, workplace, position, remuneration), so that rights and payroll inputs are defined.	Given a contract, When I save its details, Then they feed the payroll and the contract documents.	M	5	SP-03	BN-29
US-030	As an HR Officer, I want to manage contract amendments keeping successive versions and effective dates, so that changes are traceable.	Given a contract, When I create an amendment with an effective date, Then the previous version is retained and the new one applies from its date.	M	5	SP-03	BN-30
US-031	As an HR Officer, I want to be alerted before the end of a fixed-term contract or a trial period, so that action is taken in time.	Given a contract with an end or trial date, When the configured notice period is reached, Then HR is alerted.	M	3	SP-03	BN-31
US-032	As an HR Officer, I want to manage the renewal of a fixed-term contract and control the number of renewals allowed, so that legal limits are respected.	Given a fixed-term contract, When I renew it, Then the system checks the number of renewals against the allowed maximum.	S	3	SP-03	BN-32
US-033	As an HR Officer, I want to manage contract suspension and its effect on payroll and seniority, so that suspended periods are handled correctly.	Given a contract, When I record a suspension, Then payroll and seniority reflect the suspension for that period.	S	5	SP-03	BN-33

ID	User story (As a... I want... So that...)	Acceptance criteria (Given / When / Then)	Prio	SP	Sprint	Need ref.
US-034	As an HR Officer, I want to manage contract termination (reason, date, notice, leave balance, final settlement), so that departures are handled properly.	Given a contract, When I record a termination, Then the final settlement and the leave balance are calculated.	M	8	SP-03	BN-34
US-035	As an HR Officer, I want to generate the printable contract or amendment from a configurable template fed by the record, so that no document is retyped.	Given a contract, When I generate the document, Then a PDF from the template is produced with the record data.	S	5	SP-03	BN-35
US-068	As an HR Manager, I want to record a promotion (new grade, category, echelon or position, effective date, reason, decision reference) with automatic effect on base salary, so that career moves reach payroll.	Given an employee, When I record a promotion with an effective date, Then the base salary changes automatically from that date.	M	8	SP-11	BN-68
US-069	As an HR Manager, I want to record a transfer or affectation with automatic effect on the organisation chart and the cost centre, so that structure and accounting stay accurate.	Given an employee, When I record a transfer with an effective date, Then the organisation chart and the cost centre update from that date.	M	5	SP-11	BN-69
US-070	As an HR Manager, I want to manage temporary assignments, acting positions and secondments with an automatic return, so that provisional situations are tracked.	Given a temporary assignment with an end date, When the period ends, Then the employee returns automatically to the original situation.	S	5	SP-11	BN-70
US-071	As an HR Manager, I want to manage salary revisions independently of promotions, with an effective date and a justification, so that pay changes are controlled.	Given an employee, When I record a salary revision with an effective date, Then payroll applies the new salary from that date and keeps the justification.	M	5	SP-11	BN-71
US-072	As an HR Manager, I want to record disciplinary measures with date, reason, documents and payroll effect, so that discipline is traceable.	Given an employee, When I record a disciplinary measure, Then it is stored with its documents and any payroll effect.	S	5	SP-11	BN-72
US-073	As an HR Officer, I want to manage employee departure for any reason and trigger the final settlement, so that exits are handled once.	Given an employee, When I record a departure, Then the final settlement of accounts is triggered.	M	8	SP-11	BN-73
US-074	As an HR Manager, I want to display the complete career history as a chronological timeline, so that decisions are visible in one place.	Given an employee, When I open the career history, Then hiring, amendments, promotions, transfers, sanctions, trainings and departure appear in order.	M	5	SP-11	BN-74
US-075	As an HR Officer, I want to print the decision document for each act from a configurable template, so that formal decisions are issued.	Given a recorded act, When I generate its decision document, Then a PDF from the template is produced.	M	3	SP-11	BN-75
US-076	As an HR Manager, I want to require an approval circuit before an act affecting payroll becomes definitive, so that payroll changes are controlled.	Given an act affecting payroll, When it is submitted, Then it takes effect only after the approval circuit is completed.	S	5	SP-11	BN-76

EP-04 - Attendance and time tracking

ID	User story (As a... I want... So that...)	Acceptance criteria (Given / When / Then)	Prio	SP	Sprint	Need ref.
US-036	As an HR Officer, I want to record entries and exits per working day (allowing several per day), so that presence is captured.	Given a working day, When entries and exits are recorded, Then the presence of the day is stored.	M	5	SP-04	BN-36
US-037	As an HR Officer, I want to allow several recording methods (manual, self-recording, badge or biometric import), so that attendance suits every context.	Given attendance capture, When data comes from manual entry, self-recording or a device import, Then it is consolidated on the employee day.	M	5	SP-04	BN-37
US-038	As a Payroll Officer, I want the system to compute daily hours, lateness, early departure, missing hours and overtime against the schedule, so that payroll inputs are reliable.	Given a recorded day and a schedule, When the day is processed, Then worked hours, lateness and overtime are computed automatically.	M	8	SP-04	BN-38
US-039	As a Payroll Officer, I want to distinguish overtime categories (day, night, rest day, public holiday), so that they are paid at the correct rates.	Given overtime, When it is computed, Then it is classified by category for rating.	M	5	SP-04	BN-39
US-040	As a Head of Department, I want to require manager approval before overtime is sent to payroll, so that only authorised overtime is paid.	Given computed overtime, When the manager approves it, Then it is transferred to payroll; otherwise it is not.	M	3	SP-04	BN-40

ID	User story (As a... I want... So that...)	Acceptance criteria (Given / When / Then)	Prio	SP	Sprint	Need ref.
US-041	As an HR Officer, I want to identify unjustified absences and turn them into a payroll deduction, so that absence affects pay correctly.	Given an unjustified absence, When the period is processed, Then a deduction is generated on the payroll.	M	5	SP-04	BN-41
US-042	As an HR Officer, I want to produce daily, weekly and monthly attendance sheets per employee, team and department (printable and exportable), so that attendance can be reviewed.	Given a period, When I request an attendance sheet, Then it is produced and can be printed or exported.	M	3	SP-04	BN-42
US-043	As an HR Officer, I want to manage missions and field work so that an off-site employee is not counted as absent, so that presence is fair.	Given an employee on a mission, When attendance is processed, Then the employee is counted as present, not absent.	S	3	SP-04	BN-43
US-044	As an HR Officer, I want to manage the regularisation of a forgotten or erroneous clocking (with justification and approval, original kept), so that corrections are traceable.	Given an erroneous clocking, When a regularisation is approved, Then the corrected value applies and the original remains visible.	S	5	SP-04	BN-44
US-045	As a Payroll Officer, I want to consolidate and lock attendance once the payroll is validated, so that the period cannot change afterwards.	Given a validated payroll period, When attendance is consolidated, Then it is locked against modification.	M	3	SP-04	BN-45

EP-05 - Leave and absence management

ID	User story (As a... I want... So that...)	Acceptance criteria (Given / When / Then)	Prio	SP	Sprint	Need ref.
US-046	As an HR Officer, I want to manage a configurable catalogue of leave and absence types, so that any type can be handled now or later.	Given the leave catalogue, When I add a leave type, Then it becomes available for requests without any code change.	M	3	SP-05	BN-46
US-047	As an HR Officer, I want to define per type its rules (paid or unpaid, consumes entitlement, needs a document, generates a deduction, payroll and seniority treatment), so that each type behaves correctly.	Given a leave type, When I set its rules, Then requests of that type follow the configured behaviour.	M	5	SP-05	BN-47
US-048	As a Payroll Officer, I want the system to compute automatically the leave entitlement per employee, per configurable rules and seniority, so that balances are exact.	Given the entitlement rule, When the accrual runs, Then each employee acquired days are computed correctly.	M	8	SP-05	BN-48
US-049	As an Employee, I want to see acquired, taken, pending and remaining days per period, so that my balance is transparent.	Given my leave record, When I open my balance, Then acquired, taken, pending and remaining days are shown.	M	3	SP-05	BN-49
US-050	As an Employee, I want to submit a leave request (type, dates, days, replacement) with an automatic balance check, so that I no longer use a paper form.	Given a sufficient balance, When I submit a request, Then it is created and my pending days update; an insufficient balance is refused.	M	5	SP-05	BN-50
US-051	As a Head of Department, I want to route requests through a configurable approval circuit (manager then HR) with approve, refuse with a reason, or return, so that leave is validated properly.	Given a submitted request, When it enters the circuit, Then approvers can approve, refuse with a reason or request modification.	M	5	SP-05	BN-51
US-052	As a Payroll Officer, I want to exclude rest days and public holidays from the leave-day count per a configurable rule, so that only working days are counted.	Given a leave request spanning holidays, When the days are counted, Then rest days and public holidays are excluded per the rule.	M	3	SP-05	BN-52
US-053	As a Head of Department, I want to prevent or signal overlapping leave in a team beyond a threshold, so that service continuity is preserved.	Given team leave, When the overlap exceeds the threshold, Then the system blocks or warns.	S	3	SP-05	BN-53
US-054	As an HR Officer, I want to manage the cancellation, interruption and postponement of an approved leave, so that changes are handled.	Given an approved leave, When I cancel, interrupt or postpone it, Then the balance is corrected accordingly.	S	3	SP-05	BN-54
US-055	As an HR Manager, I want to produce the annual leave plan as a calendar per team and department, so that leave can be planned.	Given approved and planned leave, When I open the leave plan, Then it is displayed as a calendar per team and department.	S	5	SP-05	BN-55
US-056	As a Payroll Officer, I want to compute the leave allowance to pay on departure or at the time of leave, per the configured rule, so that allowances are correct.	Given the configured rule, When the leave allowance is computed, Then the correct amount is produced for payroll.	M	5	SP-05	BN-56

ID	User story (As a... I want... So that...)	Acceptance criteria (Given / When / Then)	Prio	SP	Sprint	Need ref.
US-057	As an HR Officer, I want to print the individual leave decision, the leave certificate and the balance summary, so that leave is documented.	Given an approved leave, When I generate the documents, Then the decision, certificate and balance summary are produced.	M	3	SP-05	BN-57
US-058	As a Payroll Officer, I want to transfer unpaid absences and leave allowances of the period to payroll automatically, so that leave affects pay without retyping.	Given a payroll period, When it is prepared, Then unpaid absences and leave allowances are transferred automatically.	M	5	SP-05	BN-58

EP-06 - Timetable and work planning

ID	User story (As a... I want... So that...)	Acceptance criteria (Given / When / Then)	Prio	SP	Sprint	Need ref.
US-059	As an HR Officer, I want to define work schedule models (fixed, flexible, rotating shifts, part time) with durations and breaks, so that different rhythms are represented.	Given the schedule models screen, When I define a model, Then it becomes available to assign.	M	5	SP-06	BN-59
US-060	As an HR Officer, I want to assign a schedule model to an employee, position, team or site with an effective date and exceptions, so that everyone has a planned rhythm.	Given a model, When I assign it with an effective date, Then it applies from that date and the exceptions are respected.	M	5	SP-06	BN-60
US-061	As an HR Officer, I want to manage the calendar of working days, rest days and public holidays per site, so that planning respects each site.	Given a site, When I set its calendar, Then planning and time calculations use it.	M	3	SP-06	BN-61
US-062	As a Head of Department, I want to build a timetable over a period by assigning employees to shifts and display it in a grid, so that duty is planned.	Given a period, When I assign employees to shifts, Then the timetable is displayed in a weekly or monthly grid.	M	8	SP-06	BN-62
US-063	As a Head of Department, I want the system to detect timetable conflicts automatically (on leave, double-booked, insufficient rest, weekly maximum), so that planning is valid.	Given a timetable, When a conflict occurs, Then the system flags it before publication.	M	5	SP-06	BN-63
US-064	As a Head of Department, I want to publish the timetable, notify employees and print it per team, employee and period, so that everyone knows their schedule.	Given a timetable, When I publish it, Then the affected employees are notified and it can be printed.	M	3	SP-06	BN-64
US-065	As an Employee, I want to manage a shift exchange or replacement subject to manager approval, so that swaps are controlled.	Given two employees, When they request a shift swap, Then it applies only after manager approval.	S	3	SP-06	BN-65
US-066	As a Head of Department, I want to duplicate a timetable from one period to another, so that recurring planning is not rebuilt.	Given an existing timetable, When I duplicate it to a new period, Then the assignments are copied.	S	3	SP-06	BN-66
US-067	As a Head of Department, I want to compare the planned timetable with the actual attendance and highlight the differences, so that deviations are seen.	Given a timetable and attendance, When I compare them, Then the differences are highlighted.	S	5	SP-06	BN-67

EP-07 - Payroll management and payslip printing

ID	User story (As a... I want... So that...)	Acceptance criteria (Given / When / Then)	Prio	SP	Sprint	Need ref.
US-087	As a Payroll Officer, I want to manage a configurable catalogue of salary elements, so that any pay element can be added without code.	Given the salary-elements screen, When I add an element, Then it is available for the payroll calculation.	M	5	SP-07	BN-87
US-088	As a Payroll Officer, I want to define per element its nature and calculation method and its tax, contribution, leave-base and payslip treatment, so that each element behaves correctly.	Given a salary element, When I set its rules, Then the calculation applies them.	M	8	SP-07	BN-88
US-089	As a Payroll Officer, I want to manage contribution and tax parameters as dated versions, so that a change applies only from its effective date.	Given a rate change with an effective date, When payroll runs for a period, Then the rate in force at that date is used.	M	8	SP-07	BN-89

ID	User story (As a... I want... So that...)	Acceptance criteria (Given / When / Then)	Prio	SP	Sprint	Need ref.
US-090	As a Payroll Officer, I want to manage the salary grid and legal minimum wage and check that no salary falls below it, so that pay is compliant.	Given a computed salary, When it is below the applicable minimum, Then the system flags it.	M	5	SP-07	BN-90
US-091	As a Payroll Officer, I want to define element values at three levels (general, category or department, individual), so that values can be overridden precisely.	Given the three levels, When an individual value exists, Then it overrides the category and general values.	M	5	SP-07	BN-91
US-092	As an HR Manager, I want to keep the complete history of every payroll parameter change, so that parameters are auditable.	Given a parameter change, When it is saved, Then the author, date and previous value are kept.	M	3	SP-07	BN-92
US-093	As a Payroll Officer, I want to manage the payroll period as a state cycle (opened to closed), each transition traced and reversible only before validation, so that the process is controlled.	Given a period, When its state changes, Then the transition is traced and reversible only before validation.	M	8	SP-07	BN-93
US-094	As a Payroll Officer, I want to capture variable elements manually or by automatic retrieval from attendance, leave and career, so that inputs are complete without retyping.	Given a period, When it is prepared, Then variable elements are retrieved automatically or entered manually.	M	5	SP-08	BN-94
US-095	As a Payroll Officer, I want to calculate gross, contribution bases, employee and employer contributions, tax and net payable per employee, so that salaries are correct.	Given prepared inputs, When I run the calculation, Then gross, contributions, tax and net are produced per employee.	M	13	SP-07	BN-95
US-096	As a Payroll Officer, I want to apply pro-rata automatically for employees hired, departing, suspended or absent, so that partial months are fair.	Given a partial month, When payroll runs, Then the salary is pro-rated automatically.	M	5	SP-08	BN-96
US-097	As a Payroll Officer, I want to calculate overtime per attendance categories and parameter rates, so that overtime is paid correctly.	Given approved overtime, When payroll runs, Then it is paid at the configured rate per category.	M	5	SP-08	BN-97
US-098	As a Payroll Officer, I want to manage advances and loans with a repayment schedule and automatic instalment deduction until repaid, so that recovery is automatic.	Given a loan, When payroll runs, Then the instalment is deducted and stops when the loan is repaid.	M	8	SP-08	BN-98
US-099	As a Payroll Officer, I want to manage third-party deductions (garnishment, alimony, union dues) with a ceiling and a beneficiary, so that legal deductions are handled.	Given a third-party deduction, When payroll runs, Then it is deducted within its ceiling and attributed to the beneficiary.	S	5	SP-08	BN-99
US-100	As a Payroll Officer, I want to manage retroactive adjustments (back pay) for a past effective date, so that late changes are corrected.	Given a promotion or revision dated in the past, When payroll runs, Then the back pay is computed and added.	M	8	SP-08	BN-100
US-101	As a Payroll Officer, I want to calculate periodic bonuses (thirteenth month, seniority, leave allowance) per configurable rules and periodicity, so that bonuses are automatic.	Given a bonus rule, When its period arrives, Then the bonus is computed.	S	5	SP-08	BN-101
US-102	As a Payroll Officer, I want to value benefits in kind and integrate them into the taxable and contributory bases, so that they are taxed correctly.	Given a benefit in kind, When payroll runs, Then its value enters the taxable and contributory bases.	S	5	SP-08	BN-102
US-103	As a Payroll Officer, I want to calculate the final settlement on departure (outstanding salary, leave allowance, notice, seniority, indemnity), so that leavers are paid correctly.	Given a departure, When I run the settlement, Then all due amounts are computed.	M	8	SP-08	BN-103
US-104	As a Payroll Officer, I want to run payroll for the whole organisation, a department or a single employee, so that calculation is flexible.	Given a scope, When I run payroll, Then only that scope is calculated.	M	3	SP-07	BN-104
US-105	As a Payroll Officer, I want a simulation mode with no accounting effect, so that questions and hiring proposals can be answered.	Given simulation mode, When I compute a payslip, Then it is produced without any effect on the accounts.	S	5	SP-08	BN-105
US-106	As a Payroll Officer, I want the system to refuse to validate a period while blocking anomalies remain, so that bad payroll is not released.	Given a blocking anomaly, When I try to validate, Then validation is refused until it is resolved.	M	5	SP-08	BN-106
US-107	As a Payroll Officer, I want to compare the current and previous period per employee and element and	Given two periods, When I compare them, Then significant variations are highlighted.	S	5	SP-08	BN-107

ID	User story (As a... I want... So that...)	Acceptance criteria (Given / When / Then)	Prio	SP	Sprint	Need ref.
	highlight variations, so that errors are caught before validation.					
US-108	As a Payroll Officer, I want to lock the period after validation (correction only by reversal, all traced), so that validated payroll is intangible.	Given a validated period, When someone tries to modify it, Then only a traced reversal is allowed.	M	5	SP-08	BN-108
US-109	As a Payroll Officer, I want to keep the full payroll history and allow consultation and reprint of any past period, so that history is preserved.	Given a past period, When I consult it, Then it can be viewed and reprinted.	M	3	SP-09	BN-109
US-110	As a Payroll Officer, I want to manage salary payment (transfer, cheque, cash) and produce the payment order and bank file, so that employees are paid.	Given a validated period, When I launch payment, Then the payment order and transfer file per bank are produced.	M	5	SP-09	BN-110
US-111	As a Payroll Officer, I want to calculate and follow amounts due to social-insurance and tax bodies with their due dates, so that declarations are paid on time.	Given a period, When it is validated, Then the amounts due per body and their due dates are produced.	M	5	SP-09	BN-111
US-112	As an Accountant, I want to compute the provision for leave not yet taken and other benefits at period end, so that liabilities are recognised.	Given period end, When provisions are computed, Then the leave and benefits provision is produced.	S	5	SP-10	BN-112
US-113	As a Payroll Officer, I want to produce and print the individual payslip with all legal mentions, so that employees receive a compliant document.	Given a validated period, When I generate a payslip, Then a PDF with all legal mentions is produced.	M	8	SP-09	BN-113
US-114	As a Payroll Officer, I want to print payslips in batch for the whole organisation, a department or a selection in one operation, so that bulk printing is fast.	Given a validated period, When I launch batch printing, Then one set of payslips is produced for the selection.	M	5	SP-09	BN-114
US-115	As a Payroll Officer, I want to reprint any past payslip identical to the original with a duplicate mention, so that copies can be reissued.	Given a past period, When I reprint a payslip, Then it is identical, marked as a duplicate.	M	3	SP-09	BN-115
US-116	As an Employee, I want to receive the payslip by e-mail or in the portal in a protected format, so that I get it conveniently.	Given a produced payslip, When it is distributed, Then I receive it in a protected format.	S	3	SP-09	BN-116
US-117	As a Payroll Officer, I want to produce the payroll book and summary with totals per department and organisation, so that payroll is consolidated.	Given a validated period, When I generate the payroll book, Then totals per department and for the organisation are produced.	M	5	SP-09	BN-117
US-118	As a Payroll Officer, I want to produce the recapitulative statement of contributions and taxes per body and due date, so that filing is prepared.	Given a validated period, When I generate the statement, Then contributions and taxes per body and due date are produced.	M	5	SP-09	BN-118
US-119	As a Payroll Officer, I want to produce statutory declarations in the required form and export format, so that legal filing is done.	Given a validated period, When I generate declarations, Then they are produced in the required form and export format.	M	8	SP-09	BN-119
US-120	As a Payroll Officer, I want to produce the annual individual salary statement and annual tax summary, so that year-end obligations are met.	Given a financial year, When I generate the annual statement, Then the individual and summary statements are produced.	M	5	SP-09	BN-120
US-121	As a Payroll Officer, I want to produce the payment order and bank transfer file grouped per bank with the total to debit, so that payment is executed.	Given a validated period, When I generate the bank file, Then it is grouped per bank with the total to debit.	M	5	SP-09	BN-121
US-122	As a Payroll Officer, I want to produce the pay-slip register, cash-payment list and signature receipt, so that cash payment is controlled.	Given cash-paid employees, When I generate the register, Then the list and signature receipt are produced.	S	3	SP-09	BN-122
US-123	As an HR Officer, I want to produce administrative certificates (work, employment, salary, presence, leave, end-of-contract, settlement), so that staff requests are met.	Given an employee, When I request a certificate, Then the chosen certificate is produced from a template.	M	5	SP-09	BN-123
US-124	As an HR Officer, I want to produce the contract, amendment, promotion or transfer decision and disciplinary letter from templates, so that HR acts are documented.	Given an act, When I generate its document, Then it is produced from a configurable template.	M	3	SP-09	BN-124
US-125	As a System Administrator, I want to let the organisation modify document templates without development, so that layout changes are self-service.	Given a template, When an authorised user edits header, logo, mentions and footer, Then new documents use the updated template.	S	5	SP-09	BN-125

ID	User story (As a... I want... So that...)	Acceptance criteria (Given / When / Then)	Prio	SP	Sprint	Need ref.
US-126	As an HR Officer, I want to export every list and report in spreadsheet and PDF, so that data can be reused.	Given any list or report, When I export it, Then a spreadsheet and a PDF are produced.	M	3	SP-09	BN-126
US-127	As an HR Officer, I want to keep a copy of every document issued (date, author, recipient) and find it again, so that document history is preserved.	Given an issued document, When it is generated, Then a copy is stored and searchable.	S	3	SP-09	BN-127

EP-08 - Accounting interface (OHADA)

ID	User story (As a... I want... So that...)	Acceptance criteria (Given / When / Then)	Prio	SP	Sprint	Need ref.
US-128	As an Accountant, I want to hold a configurable OHADA chart of accounts in classes with configurable account lengths, so that posting matches OHADA.	Given the chart of accounts, When I configure accounts and sub-accounts, Then they comply with the OHADA structure.	M	5	SP-10	BN-128
US-129	As an Accountant, I want to map every payroll element, contribution and tax to its accounts (configurable and versioned), so that entries are generated correctly.	Given a payroll element, When I map it to accounts, Then generated entries use that mapping for its effective date.	M	8	SP-10	BN-129
US-130	As an Accountant, I want to use default OHADA payroll accounts (class 6, 4 and 5) while allowing adaptation, so that setup is fast yet flexible.	Given default accounts, When I adapt an account, Then the entries use the adapted account.	M	5	SP-10	BN-130
US-131	As an Accountant, I want the system to generate the period accounting entry automatically on payroll validation, so that no re-keying is needed.	Given a validated period, When the entry is generated, Then expense accounts are debited and liability accounts credited automatically.	M	13	SP-10	BN-131
US-132	As an Accountant, I want a guarantee that no entry is saved unless debits equal credits, so that entries are balanced by construction.	Given an entry, When the debits do not equal the credits, Then the system refuses to save it.	M	3	SP-10	BN-132
US-133	As an Accountant, I want to generate the entry consolidated or broken down by department, site or cost centre, so that analytical needs are met.	Given a period, When I choose a breakdown, Then the entry is produced at that level.	M	5	SP-10	BN-133
US-134	As an Accountant, I want to generate the salary-payment entry (debit remuneration due, credit bank or cash) on the payment date, so that payment is posted.	Given a payment, When it is recorded, Then the payment entry is generated on the actual date.	M	5	SP-10	BN-134
US-135	As an Accountant, I want to generate the entry for settling contributions and taxes (debit bodies, credit treasury), so that settlements are posted.	Given a settlement, When it is recorded, Then the settlement entry is generated.	M	5	SP-10	BN-135
US-136	As an Accountant, I want to generate provision entries for paid leave and benefits and their reversal, so that provisions are accounted.	Given period end, When provisions are computed, Then their entries and reversals are generated.	S	5	SP-10	BN-136
US-137	As an Accountant, I want to manage accounting periods and the financial year and forbid entries in a closed period, so that closed periods are protected.	Given a closed period, When someone posts to it, Then the entry is refused.	M	5	SP-10	BN-137
US-138	As an Accountant, I want to number entries continuously per journal and forbid deleting or modifying a posted entry (correct by reversal), so that records are intangible.	Given a posted entry, When a correction is needed, Then it is made by a reversal, not a modification.	M	5	SP-10	BN-138
US-139	As an Accountant, I want to manage payroll journals (a dedicated payroll journal and a miscellaneous journal), so that entries are organised.	Given the journals, When an entry is generated, Then it is recorded in the correct journal.	M	3	SP-10	BN-139
US-140	As an Accountant, I want to attach to each entry the payroll period reference and justifying documents, so that auditors can trace back to the payslips.	Given an entry, When I open it, Then its period reference and justifying documents are accessible.	M	3	SP-10	BN-140
US-141	As an Accountant, I want to produce the accounting books (journal, ledger, trial balance, balances per employee and body), so that reporting is complete.	Given a period, When I generate the books, Then the journal, ledger and trial balance are produced.	M	5	SP-10	BN-141
US-142	As an Accountant, I want to reconcile the payroll with the generated entry and highlight differences, so that consistency is verified.	Given a period, When I reconcile, Then any difference between payroll and the entry is highlighted.	M	5	SP-10	BN-142

ID	User story (As a... I want... So that...)	Acceptance criteria (Given / When / Then)	Prio	SP	Sprint	Need ref.
US-143	As an Accountant, I want to export accounting entries to the accounting software and import its chart of accounts, so that integration is seamless.	Given a validated entry, When I export it, Then a file usable by the accounting software is produced.	M	5	SP-10	BN-143
US-144	As General Management, I want to analyse personnel expenses per account, department, cost centre and period versus budget, so that costs are controlled.	Given a period, When I open the analysis, Then expenses are shown per axis and compared to budget where it exists.	S	5	SP-12	BN-144
US-145	As an Accountant, I want to deliver personnel elements for the OHADA annual financial statements, so that year-end accounts are prepared.	Given a financial year, When I generate the elements, Then personnel expenses and liabilities for the statements are produced.	S	5	SP-10	BN-145
US-146	As an Accountant, I want to keep all amounts in the local currency with a single rounding rule and no rounding difference between payroll and entry, so that figures reconcile exactly.	Given payroll and its entry, When both are produced, Then there is no rounding difference between them.	M	3	SP-10	BN-146
US-147	As an Accountant, I want to trace every accounting operation (author, date, origin) and retain records for the legal period, so that accounting is auditable.	Given an accounting operation, When it occurs, Then it is traced and retained for the legal period.	M	3	SP-10	BN-147

EP-09 - Recruitment, training and evaluation

ID	User story (As a... I want... So that...)	Acceptance criteria (Given / When / Then)	Prio	SP	Sprint	Need ref.
US-022	As an HR Manager, I want to express and validate a recruitment need attached to a vacant position, so that hiring starts from a real gap.	Given a vacant position, When I create a recruitment need, Then it is linked to that position and validated.	S	3	SP-14	BN-22
US-023	As an HR Officer, I want to publish a job offer, receive applications and store documents, so that candidates are managed.	Given a recruitment need, When I publish an offer, Then applications and their documents are received and stored.	S	5	SP-14	BN-23
US-024	As an HR Officer, I want to follow each application through its stages, so that the process is visible.	Given an application, When its stage changes, Then the new stage (received to selected or rejected) is recorded.	S	3	SP-14	BN-24
US-025	As an HR Officer, I want to convert a selected application into an employee record without retyping, so that onboarding is fast.	Given a selected application, When I convert it, Then an employee record is created with the captured data.	S	5	SP-14	BN-25
US-026	As an HR Officer, I want to manage an onboarding checklist with a responsible person per item, so that integration is complete.	Given a new hire, When I open the checklist, Then each item has an owner and a status.	C	3	SP-14	BN-26
US-027	As an HR Officer, I want to keep unsuccessful applications in a pool for future needs, so that good candidates are not lost.	Given a rejected application, When I keep it, Then it is stored in the candidate pool.	C	2	SP-14	BN-27
US-077	As an HR Officer, I want to maintain a skills repository and a skill profile per position and employee, so that competencies are known.	Given the repository, When I record skills, Then they are linked to positions and employees.	C	3	SP-15	BN-77
US-078	As an HR Manager, I want to collect training needs and build the annual training plan with a budget, so that training is planned.	Given training needs, When I build the plan, Then it lists sessions with a budget.	C	3	SP-15	BN-78
US-079	As an HR Officer, I want to manage training sessions (organiser, dates, place, participants, cost, attendance), so that sessions are run.	Given a session, When I record its details and attendance, Then they are stored.	C	3	SP-15	BN-79
US-080	As an HR Officer, I want to record training results and certificates and attach them to the record, so that outcomes are kept.	Given a completed training, When I record the result, Then the certificate is attached to the employee record.	C	3	SP-15	BN-80
US-081	As an HR Manager, I want to evaluate the training effect and follow the cost per employee and department, so that return on investment is visible.	Given completed trainings, When I open the analysis, Then cost per employee and department is shown.	C	3	SP-15	BN-81
US-082	As an HR Manager, I want to define evaluation campaigns (period, population, form), so that reviews are organised.	Given the campaign screen, When I define a campaign, Then it targets the chosen population for the period.	S	3	SP-14	BN-82
US-083	As a Head of Department, I want to set objectives, follow achievement and record the self and	Given a campaign, When objectives and evaluations are entered, Then they are recorded per employee.	S	5	SP-14	BN-83

ID	User story (As a... I want... So that...)	Acceptance criteria (Given / When / Then)	Prio	SP	Sprint	Need ref.
	manager evaluation, so that performance is measured.					
US-084	As a Head of Department, I want to record the final evaluation (score, comments, actions), so that outcomes are documented.	Given an evaluation, When I finalise it, Then the score, comments and actions are stored.	S	3	SP-14	BN-84
US-085	As an HR Manager, I want to link evaluation results to a promotion, training or bonus proposal sent to payroll, so that results have effect.	Given a final evaluation, When I raise a proposal, Then it is transmitted (for example a bonus to payroll).	S	3	SP-14	BN-85
US-086	As an HR Officer, I want to print the individual evaluation record and the campaign summary, so that reviews are shared.	Given a campaign, When I generate the documents, Then the individual record and summary are produced.	S	3	SP-14	BN-86

EP-10 - Employee self-service portal

ID	User story (As a... I want... So that...)	Acceptance criteria (Given / When / Then)	Prio	SP	Sprint	Need ref.
US-148	As an Employee, I want to authenticate and consult my own record and request correction of an error, so that I control my data.	Given I am logged in, When I open my record, Then I see only my data and can request a correction.	S	3	SP-13	BN-148
US-149	As an Employee, I want to consult my leave balance, submit a request and follow its progress, so that I manage leave myself.	Given the portal, When I submit a leave request, Then I see its status and my balance updates.	M	5	SP-13	BN-149
US-150	As an Employee, I want to consult and download my payslips and attestations, so that I access my documents.	Given the portal, When I open my documents, Then I can download my payslips and attestations.	S	3	SP-13	BN-150
US-151	As an Employee, I want to consult my attendance record, timetable and planned shifts, so that I know my schedule.	Given the portal, When I open my time section, Then my attendance and shifts are shown.	S	3	SP-13	BN-151
US-152	As an Employee, I want to request an administrative document and be notified when it is ready, so that requests are simple.	Given the portal, When I request a document, Then I am notified when it is available.	C	3	SP-13	BN-152
US-153	As a Head of Department, I want to approve or refuse team requests, consult team attendance and leave and propose promotions, without seeing salaries, so that managers act without salary access.	Given a manager, When I open the team, Then I can act on requests and never see salaries.	M	5	SP-13	BN-153
US-154	As a System Administrator, I want to guarantee that an employee can never access another employee data, so that privacy is protected.	Given a logged-in employee, When they try to reach another person data, Then access is denied.	M	3	SP-13	BN-154

EP-11 - Reporting, dashboards and HR analytics

ID	User story (As a... I want... So that...)	Acceptance criteria (Given / When / Then)	Prio	SP	Sprint	Need ref.
US-155	As General Management, I want a dashboard per profile showing key indicators as figures and charts, so that each role sees what matters.	Given my profile, When I open my dashboard, Then relevant indicators are shown as figures and charts.	M	5	SP-12	BN-155
US-156	As an HR Manager, I want to see headcount indicators (total and distributions), so that staffing is understood.	Given the dashboard, When I open headcount, Then total and distributions per axis are shown.	M	3	SP-12	BN-156
US-157	As an HR Manager, I want to see movement indicators (hiring, departures, turnover, promotions, transfers), so that dynamics are visible.	Given a period, When I open movements, Then the indicators are shown.	M	3	SP-12	BN-157
US-158	As an HR Manager, I want to see time indicators (absenteeism, lateness, overtime, leave), so that time use is monitored.	Given a period, When I open time indicators, Then absenteeism, lateness, overtime and leave are shown.	M	3	SP-12	BN-158
US-159	As General Management, I want to see payroll indicators (total cost, evolution, distribution, average cost, charges weight), so that cost is controlled.	Given a period, When I open payroll indicators, Then cost and its breakdown are shown.	M	5	SP-12	BN-159

ID	User story (As a... I want... So that...)	Acceptance criteria (Given / When / Then)	Prio	SP	Sprint	Need ref.
US-160	As an HR Manager, I want to filter every report by period, department, site, category and contract and export or print it, so that reports are usable.	Given a report, When I apply filters, Then it updates and can be exported or printed.	M	3	SP-12	BN-160
US-161	As an HR Manager, I want to build a personalised report (fields, filters, grouping) and save it, so that custom analysis is possible.	Given the report builder, When I choose fields and save, Then the report is reusable.	C	5	SP-12	BN-161
US-162	As an HR Manager, I want to schedule the automatic sending of a periodic report to recipients, so that reporting is automated.	Given a report, When I schedule it, Then recipients receive it on the schedule.	C	3	SP-12	BN-162

EP-12 - Security, roles, parameters and audit

ID	User story (As a... I want... So that...)	Acceptance criteria (Given / When / Then)	Prio	SP	Sprint	Need ref.
US-163	As an Employee, I want the system to notify the actors at each step of a request (submission, approval, refusal, modification), so that everyone stays informed.	Given a request, When its state changes, Then the concerned actors are notified.	M	3	SP-06	BN-163
US-164	As an HR Officer, I want to alert HR of deadlines (trial or contract end, document expiry, retirement, anniversary), so that nothing is missed.	Given a deadline, When it approaches, Then HR is alerted.	M	3	SP-12	BN-164
US-165	As a Payroll Officer, I want to alert the payroll officer of payroll and declaration due dates, so that filing is timely.	Given a due date, When it approaches, Then the payroll officer is alerted.	M	2	SP-12	BN-165
US-166	As a System Administrator, I want to define approval circuits per request type with levels and a substitute, so that workflows are flexible.	Given a request type, When I define its circuit, Then requests follow it, using a substitute when the approver is absent.	S	5	SP-12	BN-166
US-167	As an Employee, I want an in-app notification centre plus e-mail with channel choice, so that notifications suit me.	Given notifications, When I set my channels, Then I receive them via the chosen channels.	S	3	SP-12	BN-167
US-168	As a System Administrator, I want to escalate a request that stays unanswered beyond a delay, so that requests are not stuck.	Given a pending request, When the delay is exceeded, Then it is escalated.	C	3	SP-12	BN-168
US-169	As a System Administrator, I want to authenticate every user individually with no shared account, so that actions are attributable.	Given login, When a user signs in, Then it is an individual account, not a shared one.	M	3	SP-01	BN-169
US-170	As a System Administrator, I want to manage roles and profiles with fine-grained permissions per module and action, so that access is precise.	Given a profile, When I set permissions per action, Then the user can do only those actions.	M	5	SP-01	BN-170
US-171	As a System Administrator, I want to restrict data visibility per perimeter (own, team, department, site, organisation), so that users see only their scope.	Given a perimeter, When a user opens data, Then only data in their perimeter is shown.	M	5	SP-01	BN-171
US-172	As a System Administrator, I want to protect salary information so that only authorised payroll and HR profiles can see it, so that pay is confidential.	Given salary data, When an unauthorised user tries to view it, Then it is hidden.	M	5	SP-01	BN-172
US-173	As a System Administrator, I want to record an unalterable audit trail of sensitive operations (author, date, machine, previous value), so that everything is traceable.	Given a sensitive operation, When it occurs, Then it is written to the audit trail with full context.	M	5	SP-01	BN-173
US-174	As a System Administrator, I want to impose a password policy, first-login change and inactive-session closing, so that access is secure.	Given a user, When they log in, Then the password policy and session rules apply.	M	3	SP-01	BN-174
US-175	As a System Administrator, I want to let an authorised user consult and export the audit trail but forbid modifying or deleting it, so that the trail is trustworthy.	Given the audit trail, When an authorised user opens it, Then they can consult and export but not alter it.	M	3	SP-01	BN-175
US-176	As a System Administrator, I want to add a second authentication factor for payroll-access profiles, so that sensitive access is stronger.	Given a payroll profile, When they log in, Then a second factor is required.	C	5	SP-01	BN-176

ID	User story (As a... I want... So that...)	Acceptance criteria (Given / When / Then)	Prio	SP	Sprint	Need ref.
US-177	As a System Administrator, I want to comply with personal-data protection rules (purpose, minimisation, retention, right to consult and rectify), so that data use is lawful.	Given personal data, When it is handled, Then the protection rules are enforced.	M	5	SP-01	BN-177
US-178	As a System Administrator, I want to configure reference data without development (departments, positions, grades, categories, leave types, salary elements, templates, circuits, accounting mapping), so that the system adapts by configuration.	Given reference data, When an authorised user edits it, Then the change applies without a new development.	M	5	SP-01	BN-178
US-179	As a System Administrator, I want to import initial data from spreadsheets with a rejection report, so that go-live starts from clean data.	Given an import file, When I run the import, Then valid lines are loaded and rejected lines are reported.	M	8	SP-15	BN-179
US-180	As a System Administrator, I want to import attendance data from a badge or biometric device in a documented format, so that devices integrate.	Given a device file, When I import it, Then attendance is loaded per the documented format.	S	5	SP-04	BN-180
US-181	As an Accountant, I want to export accounting entries to the accounting software and payment orders to the bank in the expected formats, so that third parties integrate.	Given validated entries and orders, When I export, Then files in the third-party formats are produced.	M	5	SP-10	BN-181
US-182	As a System Administrator, I want to manage interface and document languages (English and French at least), so that users work in their language.	Given a user, When they choose a language, Then the interface and documents use it.	S	5	SP-15	BN-182
US-183	As a System Administrator, I want automatic regular backup and controlled restoration, so that data is safe.	Given the backup job, When it runs, Then data is backed up and can be restored after a control.	M	3	SP-00	BN-183

10. User Story Card (for complex stories)

During refinement, a complex story may be detailed on an individual card. The blank card below follows the project template and can be copied for any story (for example the payroll calculation, US-095).

USER STORY CARD		
Identifier: US-.....	Epic:	Feature:
Title:		
As a (actor):		
I want (capability):		
So that (business benefit):		
Acceptance criterion 1 - Given When Then		
Acceptance criterion 2 - Given When Then		
Acceptance criterion 3 - Given When Then		
Business / calculation rules:		
Dependencies:	Documents to print:	
Priority (MoSCoW):	Estimate (SP):	Sprint:

11. Definition of Ready and Definition of Done

Definition of Ready (before a story enters a sprint)

- The story is written in the As a... I want... So that... format and follows the INVEST criteria.
- The business value and the priority are set by the Product Owner.
- Acceptance criteria are written, testable and understood by the whole team.
- Business, calculation and legal rules are documented and validated.
- Dependencies, mock-ups and required data are identified and available.
- The story is estimated and small enough to be delivered inside one sprint.
- The traceability reference to the Expression of Need (BN) is filled in.

Definition of Done (before a story is declared finished)

- The code is written, reviewed by a peer and merged into the main branch.
- Unit and integration tests pass; the agreed coverage threshold is reached.
- All acceptance criteria are verified by the Product Owner on the test environment.
- Input validation, access control and audit traces are implemented.
- Printed or exported documents are checked against the legal layout expected by the business.
- Technical and user documentation is updated.
- No blocking or critical defect remains open; the increment is deployed on the demonstration environment.

12. Traceability Matrix

The matrix guarantees that every business need expressed by the Product Owner is covered by at least one user story, and that no story exists without a justified need. In this backlog the mapping is one-to-one, so coverage is 100 percent. The summary below is given per module; the exact BN reference of each story is in the Need ref. column of section 9.

Need ref.	Module	Epic	User stories	Coverage
BN-01 - BN-08	M-01 Organisation and structure	EP-01	US-001 - US-008	100%
BN-09 - BN-21	M-02 Employee records	EP-02	US-009 - US-021	100%
BN-22 - BN-27	M-03 Recruitment and onboarding	EP-09	US-022 - US-027	100%
BN-28 - BN-35	M-04 Contract management	EP-03	US-028 - US-035	100%
BN-36 - BN-45	M-05 Attendance and time tracking	EP-04	US-036 - US-045	100%
BN-46 - BN-58	M-06 Leave and absence	EP-05	US-046 - US-058	100%
BN-59 - BN-67	M-07 Timetable and work planning	EP-06	US-059 - US-067	100%
BN-68 - BN-76	M-08 Career management	EP-03	US-068 - US-076	100%
BN-77 - BN-81	M-09 Training and skills	EP-09	US-077 - US-081	100%
BN-82 - BN-86	M-10 Performance evaluation	EP-09	US-082 - US-086	100%
BN-87 - BN-112	M-11 Payroll management	EP-07	US-087 - US-112	100%
BN-113 - BN-127	M-12 Payroll and HR documents	EP-07	US-113 - US-127	100%
BN-128 - BN-147	M-13 Accounting (OHADA)	EP-08	US-128 - US-147	100%
BN-148 - BN-154	M-14 Self-service portal	EP-10	US-148 - US-154	100%
BN-155 - BN-162	M-15 Reporting and dashboards	EP-11	US-155 - US-162	100%
BN-163 - BN-168	M-16 Notifications and workflow	EP-12	US-163 - US-168	100%
BN-169 - BN-177	M-17 Security, roles and audit	EP-12	US-169 - US-177	100%
BN-178 - BN-183	M-18 Parameters, import, export	EP-12	US-178 - US-183	100%

Total: 183 business needs covered by 183 user stories across 12 epics.

13. Status Codes

Status	Meaning
New	Story created, not yet refined.
Refined	Story clarified and estimated, not yet ready.
Ready	Story satisfies the Definition of Ready.
To do	Story selected in the current sprint, not started.
In progress	Development started.
In test	Development finished, verification in progress.
Done	Story accepted by the Product Owner and satisfying the Definition of Done.
Blocked	Story stopped by an impediment; the reason must be documented.
Cancelled	Story withdrawn from the backlog by the Product Owner.

End of the Product Backlog
